quot power star quot inverters south africa

All solar products, power systems, water heating and gas products and their components must be installed by appropriately qualified personnel. All installations must adhere to local wiring regulations and standards. Sustainable Online will not be held liable for any product malfunctions as a result of incorrectly installed systems.

Revolutionize your water heating system with our range of Geyserwise PV Kits! Benefits include compatibility with any geyser, frost-proof design, enhanced temperature control, and expandable modular system. say goodbye to high electricity bills and hello to an eco-friendly, cost-effective alternative.

Spring is in the air, and it's the perfect time to refresh your home and lifestyle with eco-friendly solutions. At Sustainable , we are celebrating the season of renewal with incredible promotions that will help you save energy, reduce your carbon footprint, and embrace a more sustainable way of living.

Unlock the power of the sun with our top-tier Megarevo solar power systems! Why Choose Megarevo? Efficient and Economical: Save on installation costs and reduce your carbon footprint. Smart Technology: Manage your power with ease using our smart hybrid inverters with seamless integration.

In a singular location, supply voltages and frequencies vary widely. With this in mind, the MLT inverters have the dynamic functionality to be configured to be less sensitive to unstable grids, to regulate voltage & power quality (Powerstar only), and to integrate seamlessly with generators.

The Powerstar inverter range is designed to be a robust and reliable hybrid energy storage platform. It is ideal for applications as varied as off-grid farms and lodges to urban houses and factories. It provides a smart and seamless interface between the grid, generators, renewable energy and storage.

Designed for harsh environmentsSingle phase transformer-basedLow-voltage 48VDCNRS097-2-1:2017 CompliantBuilt in CAN port for communication with a BMSBuilt in remote monitoring

Powerstar MAX offers variable or "electronic-dynamic" voltage optimisation, meaning that rather than reducing voltage by a set amount it will match the incoming voltages "peaks and troughs", providing a constant output, even to unstable profiles. Learn more by navigating through the product pages below.

TheNewPowerstar inverter range is designed to be a robust & reliable hybrid energy storage platform. It is ideal for applications as varied as off-grid farms and lodges to urban houses and factories. It provides a smart & seamless interface between the grid, generators, renewable energy and storage.
