

5 kw hydro turbine generator

5 kw hydro turbine generator

Suneco Hydro Supplies 5kw Hydro Turbine/5 kw pelton turbine, 50 kw Hydro Generator, 100kw Hydro Turbines with Good Price and Fast Delivery. 5 kw Pelton Turbine is also available.

If you are looking for 5kw micro hydro generator for your water site, you've come to the right place! Suneco micro hydro turbine price is the most competitive one with high standard quality.

According to Suneco Hydro Calculation, the 5kw hydro turbine price is around US\$9,834.00 / Set. It include 5 kw pelton turbine complete parts for your water site and shipping cost to USA, and also to Canada.

But before you inquiry the cost of 5kw hydro turbine & 5kw water turbine generator/5 kw pelton turbine, please send us your water head and water flow data, we will calculate it for you for an accurate price.

We have 5kw Hydro Turbine Price and all technical datas for you from this page. Suneco micro hydro turbine price ranges from US\$1,000.00 TO USD30,000.00. For different micro hydro turbines, 3kw, 5kw, 10kw hydro generators. Please provide us the exact waterhead and water flow of your water site, so we calculate the right hydro generator units and the price for you.

If you read carefully on this page, you will find the rough 5kw hydro turbine price, which is below US\$10,000.00 including sea freight shipping to USA and Canada, and to Europe(France, Germany, Spain, Portugal, Italy, Sweden, Finland).

This 5kw hydro turbine price is the kits price including hydro turbine, generator, and control box, and all complete necessary parts for the installation of the 5kw hydro turbine.

Suneco Hydro has been a Micro Hydro Power Turbine Manufacturer since 1991. In 2016 Suneco Hydro invested in a new factory to manufacture micro hydro power turbines. We brought over 25 years of turbine manufacturing experience to micro power production as well as our R&D expertise. Because we manufacture the component parts of the micro hydro turbines, we have more price advantage and quality control ability than any other micro hydro turbine manufacturer. With the two years growth...

NewEnergy's EnviroGen EVG-005 hydro turbine is ideal for home power, farms, remote sites, and small communities where the requirement for electricity is relatively low. If you live near a river, with water at least 4 feet deep and a flow rate over 1 m/s, an EnviroGen turbine might be perfect for your location.

EnviroGen turbines are designed to be easy to transport, assemble and deploy without the need for cranes or other heavy equipment, making them ideal for remote locations or where equipment access can be difficult. 24 hour a day generation makes these power units suitable to power critical applications such as refrigeration or

5 kw hydro turbine generator

telecommunications.

The 5kW axial flow hydro power generator for home offers outstanding performance. With a power of up to 5kW, it is suitable for 220/380V and has a waterjet diameter of up to 20 centimeters. Its design allows it to operate in a head range of 2.5 to 5.5 meters with a flow rate control of 0.116 to 0.156 m/s, ensuring efficient power generation. Its subtle axial flow design maximizes the efficiency of water energy conversion. This turbine can be flexibly applied to water flow resources to provide clean energy for various power needs in a reliable and stable manner.

The 5kw water turbine generator utilizes an axial flow design that provides a more compact structure and higher efficiency than traditional turbines. Its axial flow design allows the water to flow more directly through the turbine, maximizing the conversion of kinetic energy from water to electricity, thus increasing power generation efficiency.
