

About ZOLA Electric

About ZOLA Electric

ZOLA Electric, initially founded as Off Grid Electric by Xavier Helgesen, Erica Mackey, and Joshua Pierce, started in Tanzania, where the founders saw that both off-grid and on-grid communities depended on costly and harmful energy sources, such as diesel, kerosene, and lead-acid batteries. These inefficient backup systems restricted the social and economic progress of these communities.

ZOLA sells its West Africa integration JV to EDF, becoming exclusive technology supplier and converting to a pure play Energy Technology company sold to enterprise customers.

ZOLA becomes full-fledged platform company sold BtoB with launch of Zi, Edge, B2B services across GTM, sales, technical and data. Gen1 Platform selling in over 10 Energy Access countries across 4 continents.
