

Algeria energy storage policy

Energy system of Algeria. Algeria is a large oil and gas producer and exporter. In 2015, the country updated its Renewable Energy and Energy Efficiency Development Plan to 2030, and put greater focus on the deployment of large-scale renewables, including solar PV and onshore wind installations, through various incentive measures.

In 2015 Algeria adopted update to its Renewable Energy and Energy Efficiency Development Plan until 2030. The review of the Plan puts greater focus on deployment of large-scale solar PV installations and onshore wind due to large technology costs decrease as well as introduction of biomass, cogeneration and geothermal technologies into the mix ...

The importance of Algeria as a strategic and reliable partner in the EU energy supply of natural gas has been emphasised and the evolution of European demand and supplies by Algeria has been discussed.

According to BP's 2022 Statistical Review of World Energy, Algeria exported about 1.9 Tcf of natural gas in 2021, most of which went to Europe. About 567 billion cubic feet (Bcf) of natural gas was exported as LNG, and the remaining 1.4 Tcf was shipped via pipeline (Figure 10 and Figure 11).²⁰

Algeria aims to produce 27 percent of its electricity from renewable resources by 2035, mostly from solar power. To reignite the country's energy transition, in 2021, the Algerian government made a new push to develop strategic partnerships in the field of renewable energies with multiple countries, including China, Germany, and the United ...
