American Custom Drying

American Custom Drying is a leading toll manufacturer and custom spray dryer in U.S. With over 60 years of experience, we process a full line of industry standard spray dried ingredients. We provide our customers the flexibility to start with pilot runs before progressing to full scale production. We are committed to provide our customers the best quality, 24/7 technical support with our team of engineers and help them increase yield.

At American Custom Drying, we provide solutions to our customers' projects. If you need more information about our services, have a project to discuss or would like to schedule a plant visit, please contact below. Our technical experts will work with you every step of the way to achieve the best results possible.

Used glasses, crockery and cutlery need to be spotlessly clean and ready for use again in next to no time. By changing the water between individual programme stages, the Miele fresh-water system guarantees a consistently high cleaning quality throughout the entire period of operation, which no other system can. Miele commercial dishwashers with a tank system work particularly quickly and economically and are always ready for use. They are the perfect solution when it is necessary to achieve extremely fast but thorough cleaning results.

Miele's service network of professional service engineers means that help is available fast and without fuss. It even starts with delivery as Miele's team of experts provides support in commissioning machines. Regular maintenance and inspections as well as professional care also ensure maximum operating reliability. Thanks to the quality of Miele products "Made in Germany", our clients profit from extreme longevity and the availability of spare parts for up to 15 years - even if a machine is no longer listed.

Cleanliness is the watchword in the hotel and restaurant trade. Hygiene and cleanliness are paramount when it comes to laundry and crockery. Hygienic reprocessing helps avoid and prevent infections.
