

Antigravity battery replacement

Antigravity battery replacement

Using our Battery Finder tool is the quickest and easiest way to find the best Antigravity Battery to replace the one in your Car, Truck, Motorcycle, UTV, and even Farm Equipment like Tractors and Lawn Mowers. Select your vehicle make, model, year and engine size to find the right match. You might find there are multiple battery options that are compatible with your vehicle. Depending on your application you may want to go with the higher or lower Amp Hour option we offer. If you have any questions let us know. See below for more information on battery fitment and sizing.

PLEASE NOTE: Certain modern Vehicles do come with Proprietary Lithium Batteries from the Factory (some Porsche, McLaren, Ferrari, BMW etc.). We do offer replacements for these batteries, but at times modification is required in the Car's Computer setting, and in some vehicles you may need to replace the Ground strap or other items. You will see these listings noted as "PLEASE CALL US" in the Battery Finder, so please reach out to us for details.

The Antigravity AT12BS-HD-RS is a hi-power lightweight Lithium battery, built with our groundbreaking RE-START Technology (built-in jump-starting) so you won't ever get stranded with a dead battery again! This is the HEAVY DUTY version of our standard duty AT12-BS-RS and offers more capacity/cranking power for those who need it.

Never stranded again! Antigravity Batteries introduces the groundbreaking RE-START (RS) line of batteries - the first batteries with built-in jump starting! The revolutionary AT12-BS-HD-RS RE-START Battery intelligently monitors its status, and just before going completely dead puts itself to sleep with just enough energy to get your vehicle started again. Simply press the RE-START Button located on the battery, start your vehicle and drive away! No more dead battery emergencies or being stranded!

Is your battery hard to reach in your motorcycle or powersports vehicle? Use our NEW RE-START REMOTE accessory to activate the built-in Jump Starting of our batteries, instead of having to access the battery and push the RE-START Button. Simply connects to your existing Battery Charging Harness (SAE/Battery Tender type) to remotely activate the RE-START feature of the battery. No need to remove your seat or access the battery.

(*Over-Charge protection will not protect from a faulty/old Voltage Regulator spiking Hi-Voltages to Battery. If you have a Pre-1990s Motorcycle replace your voltage regulator; it is over 25 year old and most likely broken by now.)

Antigravity Re-start Lithium Batteries introduces the groundbreaking "RE-START (RS)" line of batteries - the first batteries with built-in jump starting! The revolutionary ATZ-7 RE-START battery intelligently monitors

Antigravity battery replacement

its status and just before going completely dead puts itself to sleep with just enough energy to get your vehicle started again. Simply press the RE-START button located on the battery, start your vehicle and drive away... no more dead battery emergencies or being stranded!

The new ATZ-7 Re-Start battery is an extremely lightweight and high-power Lithium-Ion replacement for the heavy lead/acid battery found in many motorcycles including most every enduro bike on the market. Additionally, the new ATZ-7 offers the first full Battery Management System (BMS) found on a powersport battery and includes low-voltage cut-off, over discharge, over-charge, and thermal protections with real time lithium-ion cell balancing.

*Over-Charge protection will not protect from a faulty/old voltage regulator spiking hi-voltages to battery. If you have a pre-1990s motorcycle, replace your voltage regulator.
