

## Avaru electricity regulations

ANDHRA PRADESH ELECTRICITY REGULATORY COMMISSION Compensation to Victims of Electrical Accidents Regulation, 2017 (Regulation No. 2 of 2017) Whereas Section 53 of the Electricity Act, Central Act 36 of 2003 prescribes specification of suitable measures for, - (a) protecting the public (including the persons engaged in the generation, transmission

Electricity Regulatory Authority (ERA) is a Statutory Body established in the year 2000 in accordance with the Electricity Act 1999 (Chapter 145 Laws of Uganda) to regulate the generation, transmission, distribution, sale, export & import of electrical energy in Uganda, and to guide the liberalization of the electricity industry, manage ...

These regulations may be called the APERC Renewable Power Purchase Obligation (Compliance by purchase of Renewable Energy/Renewable Energy Certificates) Regulations, 2022. These regulations shall come into force with effect from 1st April, 2022. These Regulations shall apply throughout the State of Andhra Pradesh.

VIJAYAWADA: The Andhra Pradesh Electricity Regulatory Commission (APERC) on Thursday issued regulations specifying the obligations for purchase of renewable power and its compliance by the ...

The Andhra Pradesh Electricity Regulatory Commission (APERC) has recently introduced a new regulation focused on fostering green energy through open access, adjusting associated charges, and establishing new banking rules. This landmark regulation, officially known as the "Green Energy Open Access, Charges, and Banking Regulation, 2024 ...

As per the orders issued, hybrid energy sources have been defined as two or more renewable energy sources used together or any single renewable energy source coupled with any storage technology to provide increased system efficiency as well as greater balance in energy supply.

The order reads that every distribution licensee shall purchase from renewable energy sources at the tariff determined by the commission under Section 62 of the Act or its tariffs discovered through a transparent process of bidding u/s 63 of the Act and adopted by the commission, minimum quantities of electricity expressed as a percentage of its consumption of energy for different periods.

The minimum quantity of renewable electricity to be purchased as a percentage of total consumption from the date of gazette notification to the end of the current fiscal is 18% and in the subsequent four financial years it will be 19%, 20%, 22% and 24% respectively.

Every consumer owning a captive generating plant of installed capacity of 1 MW and above and connected to the grid, shall purchase from renewable energy source or consume from his captive renewable energy sources,

minimum quantity of electricity expressed as a percentage of his consumption of energy from such captive generating plant for different periods will be same as specified above.

The Andhra Pradesh Electricity Regulatory Commission (APERC) has recently introduced a new regulation focused on fostering green energy through open access, adjusting associated charges, and establishing new banking rules. This landmark regulation, officially known as the "Green Energy Open Access, Charges, and Banking Regulation, 2024," was announced on May 2, 2024, in Amaravati, and is aimed at significantly promoting sustainable energy practices in the region.

Under the new framework, the regulation introduces more accessible measures for energy consumers and producers to invest and participate in green energy initiatives. This initiative is seen as a crucial step toward achieving the state's ambitious renewable energy goals. The regulation facilitates easier access for consumers to green energy sources, which is expected to not only boost the local green energy market but also support the national agenda on sustainable energy.

The regulation also revises the charges associated with green energy procurement. The APERC has laid out a structured tariff system that incentivizes the adoption of renewable energy sources by making them more economically viable for consumers. This change is anticipated to attract more investments into the renewable sector and is part of a broader effort to make green energy a more attractive option compared to conventional energy sources.
