Bandar Seri Begawan is home to Istana Nurul Iman, the largest residential palace in the world by the Guinness World Records,⁵ and Omar Ali Saifuddien Mosque, Brunei's iconic landmark. It is also home to Kampong Ayer, the largest "water village" in the world and nicknamed Venice of the East.⁶ It was once the host city of the 20th Southeast Asian Games in 1999 and 8th APEC Summit in 2000.

On 1 August 2007, Sultan Hassanal Bolkiah gave consent for the expansion of the city from 12.87 km² (4.97 sq mi) to 100.36 km² (38.75 sq mi).³⁸

Brunei has an equatorial, tropical rainforest climate more subject to the Intertropical Convergence Zone than to the trade winds and rare cyclones. The climate is hot and wet.⁴⁹ The city sees heavy precipitation throughout the year, with the northeast monsoon blowing from December to March and the southeast monsoon from around June to October.⁵⁰ The wettest day on record is 9 July 2020, when 662.0 millimetres (26.06 in) of rainfall was reported at the airport.

The capital is connected by bus from Bandar Seri Begawan to the western part of the country by road. Road access to/from the exclave of Temburong is via the Sultan Haji Omar Ali Saifuddien Bridge --until the bridge opened in 2020, it was necessary to travel through Sarawak in Malaysia, via the town of Limbang.
