

## Bang on Tyres

The tyre is distinguished by its directional tread responsible for the efficient drainage of water and slush from under the wheels. The extended number of grooves minimises the risk of aquaplaning and provides a good grip, even in extreme road conditions.

The optimised design of the tyre and the wide tread improve the stability during a high-speed drive. Nankang NS-2R WT is silent, has an attractive look and wears slowly and evenly. The tyre is proposed for all the speed lovers who also value safety and comfort in any weather conditions.

Nankang Rubber Tire is a Chinese manufacturer of economy-class tyres. The company offers tyres designed for passenger cars, motorcycles, light trucks and buses. All of the brand's products meet the standards and requirements of the European Union.

The company is an important player in the world tyre industry. In 2006, a respective 35% and 32% of the company's total revenue was generated in the Americas and Europe. The enterprise is the oldest tyre manufacturer in Taiwan. Its history dates back to 1940. Currently Nankang manufactures tyres under such brands as Geostar, Milestar and Provato, and also exports its products to over 100 countries worldwide.

Delivery to the fitting station step by step. When placing your order, you can choose one of many garages available on the website to which we can deliver. The goods will be delivered to the location and the specialists there will fit the tyres/rims. Please check the price list and contact the workshop once you have received an e-mail with confirmation that the goods have been delivered.
