Best battery for golf cart

Top 4 golf cart batteries Staff favorite: Amstron GC2 6V AGM Deep Cycle Battery Best budget: ExpertPower EXP33 12V 33Ah General Purpose VRLA Battery Best lithium-ion: Enduro Power Baja Series 12v 300Ah Deep Cycle...

Lucas do AGM/VRLA (Valve Regulated Lead Acid) batteries to fit a huge range of different industrial and leisure applications, from toys, golf, mobility, alarm systems, medical applications, emergency lighting and many, many more. This technology has extra deep cycle capability that fits 95% medical, golf and industrial applications. Non hazardous and safe and easy to transport.

Hillman Lithium batteries are an excellent and affordable upgrade for most golf buggy"s, they are supplied with a specialised charger and an Anderson connection lead to connect to the buggy controller.

The casing has an integrated charging port fitted you can charge the battery anywhere, transporting the battery is a breeze as incredibly the weight has been kept at under 9kg there is also a sturdy folding handle that always returns to the flat position and is easy to grab even with gloves on.

The amazing weight savings of having a single 24V Lithium battery instead of two heavy 12V Lead-Acid batteries will reduce the load on the motor and other parts which will in turn increase their life span. All Hillman Lithium Battery Kits are supplied with a connection lead to connect the battery to the buggy, this is essential if you are upgrading from two 12V Lead Acid batteries. And a specialised Lithium Battery Charger to ensure you get the best from the battery.

Important Note; The stated number of holes the battery does is based on use with a Hillman Golf Buggy. When used on other buggy"s the range may vary, please contact us for advice before purchase.
