

Best power inverter 2024

Now portable power and lightweight design are yours with the Champion 2200-watt inverter generator. Rely on the 79cc engine and enjoy a quiet 58 dBA for up to 10.5 hours of run time (at 25% load).

True Sine Wave inverter technology makes this generator ideal for sensitive electronics such as computers, laptops and TV. Perfect for your next camping trip or powering small household items like fridges/freezers, power tools, lighting units & garden equipment. This inverter has parallel capability allowing you to pair up with other Champion Inverters using an optional Parallel Kit.

The HY6500SEi is the top of the range portable inverter leisure generator from Hyundai. Providing a convenient and cost-effective source of power the HY6500SEi is the perfect generator for providing portable power on the move.

Powered by the extremely powerful Hyundai IC390E 389cc 4-stroke OHV engine producing a max output of 6.6kW, the HY6500SEi is capable of powering a number of home appliances allowing you to take the modern luxuries of home with you wherever you go. Ideal for the serious motorhome, sports home or horsebox enthusiasts, uses include motorsport, equestrian, home standby, DIY garage.

The compact symmetrical suitcase generator design allows effective storage, transportation and manoeuvrability. Weighing 89kg combined with the front and rear moulded grip handles and four wheels, make transportation easy across a variety of surfaces.

The HY6500SEi petrol generator houses the latest Hyundai digital inverter technology designed to cope with inductive loads applied when using power tools and electric motors with high start up currents. The LCD display makes it easy to monitor the performance of the generator, displaying voltage, frequency and hours run.

Producing a pure sine wave output, it can safely power sensitive electronics without risk of damage from unstable sine waves or frequency fluctuation. Starting the generator is simple with key start or a wireless remote start system that will start and stop the generator up to 15 metres away.

Built to be user-friendly with low maintenance requirements the HY6500SEi features digital overload protection to protect the generator from being overloaded, and low oil shutdown also turns off the generator should the oil levels drop too low.

Highly economical, the HY6500SEi has an "ECO" mode which, when selected, will lower the engine speed to match the load applied to the generator, which in turn increases the fuel economy, lowers noise levels and extends the lifespan of the engine making the HY6500SEi portable generator extremely economical.

(*Free delivery and Express delivery services are not available for orders to International countries; out of area postcodes in the UK and a products that require a specialist delivery. A surcharge of £5.95 may be applied for deliveries to out of area postcode deliveries. For full details about out of area postcodes, please see the ‘out of area charges and delivery times’ section below).

Deliveries involving specialist or dangerous goods that necessitate additional precautions, such as marking transport units, declaring information to authorities and shipping companies, and handling documentation, may incur extra fees. A surcharge of £1 may apply to these items, with a specific charge of £4.95 for batteries.
