

Bosch car batteries uk

The Bosch S4 202 Car Battery is a powerful car battery which has been designed to provide optimal power. It offers extra starting power for your vehicle, enabling you to start up even in the harshest of weather conditions. Exceeding OEM requirements, it goes above and beyond what your car needs to keep moving.

This Bosch car battery also offers up to 20% more service life as well as up to 15% more Cold Cranking, as part of Bosch's S4 range. Furthermore, the Bosch 202 car battery comes fully charged and ready to fit as well as having a 3 year warranty as a guarantee of its performance.

Avoid the hassle by having the RAC Shop professionally install your new battery for you. During your purchase online, you will be asked to select a fitting time and location so that an engineer can then attend your home or place of work to fit your battery for you.

Changing a battery can be a difficult and daunting job. However, having an engineer come and professionally fit it will not only provide peace of mind that your car will soon be up and running but also guarantees that the battery will be fitted properly.

Delivery is free for orders over £50 (excluding car batteries) and £4.99 for next day delivery. Standard delivery is £3.30 for all other orders with a few exceptions for some postcodes* and for some very heavy or very large products. The shipping costs for these can be found at checkout.

Some items are flagged as being available to order. In these cases we will either have the product sent direct to you from our suppliers or they will be sent to us to forward on to you. In some cases this can take up to five working days from receipt of your order. If deliveries are to be delayed for any reason a customer service representative will get in touch with you to let you know and agree how you wish to proceed.
