

Brazzaville solar energy research and development

Brazzaville solar energy research and development

DescriptionThe project is being developed and currently owned by AMEA Power. The company has a stake of 100% ngo-Brazzaville Solar PV Project is a ground-mounted solar project.

Blending expert knowledge with cutting-edge technology, GlobalData's unrivalled proprietary data will enable you to decode what's happening in your market. You can make better informed decisions and gain a future-proof advantage over your competitors.

This information is drawn from GlobalData's Power Intelligence Center, which provides detailed profiles of over 170,000 active, planned and under construction power plants worldwide from announcement through to operation across all technologies and countries worldwide.

Taking advantage of the Democratic Republic of the Congo's (DRC's) significant solar energy potential, renewable energy developer, Bboxx, and telecommunications operator, Orange Telecom, partnered this month for the launch of a solar mini-grid project in the Central African country that aims to connected over 600 households to clean energy solutions by the end of the year.

Situated approximately 10km from Bakavu, the capital of the South Kivu Province, the solar plant was constructed by GoShop, the largest distributor of large solar systems in the country.

The MSGBC Oil, Gas & Power conference remains the only event entirely dedicated to exploring energy opportunities in Mauritania, Senegal, The Gambia, Guinea-Bissau and Guinea-Conakry.

Delegates are able to access high-level insights from African policymakers and government officials, one-to-one investor matchmaking services and exclusive oil and gas market forecasts.
