Chisinau energy storage investment

Monsson has successfully transferred 100% of the social shares of a 50MW park located in the Chisinau-Cris area of Arad County. The project is fully licensed, and NEPI Rockcastle is scheduled to start construction in January 2025.

"We are happy and proud to have started this cooperation with NEPI Rockcastle, the largest owner, operator and developer of shopping centers in Central and Eastern Europe. As we have predicted for some time, it is time for large consumers to invest in renewables to make their own consumption more efficient, and this is certainly just the beginning," says Sebastian Enache, member of the Monsson board.

The 50MW project in Chisinau-Cris (Arad County) has been part of Monsson's portfolio since 2022, and in 2024 it obtained the construction permit and signed the grid connection contract. Thus, all conditions have been ensured to start construction in 2025. The project also includes an energy storage unit, designed to streamline the operation of the photovoltaic park and contribute to balancing the national energy system.

The United States Agency for International Development (USAID) and the Government of Moldova will collaborate to advance Moldova's energy security through the USAID Moldova Energy Security Activity (MESA). Through MESA, USAID will invest \$17 million over the next four years to help strengthen and diversify Moldova's energy sector, building long-term energy security that supports Moldova's sovereignty.

USAID is supporting the Government of Moldova to improve the country's energy security and to harness a new and cleaner energy supply--including from Moldova's own renewable resources like solar and wind.

The Moldova Energy Security Activity builds on previous USAID technical assistance to bolster the government's efforts to diversify energy supply sources. These previous efforts include support for construction of the Ungheni-Chisinau pipeline that already provides an alternative to Russian natural gas by connecting the Moldovan gas transportation system to Romania and Europe.
