We understand that some of our customers may be affected by the Canada Post service disruption where mail delivery could be delayed. Take steps now to ensure continued access to your Hydro Ottawa bill and account information online. [Learn more](#)

Much of Ottawa's infrastructure in use today was built between the 1960s and 1980s. System planners at the time used 50 to 100 years of historical trends to predict future energy demand. But our world is changing faster than anyone could have predicted. Consequently, infrastructure from only 40 years ago can't keep pace with today's climate and lifestyle changes.

Hydro Ottawa's grid modernization strategy is a comprehensive plan to address challenges including aging infrastructure, decarbonization and shifting customer expectations. This strategy will guide our investments toward a modernized smart grid.

Needed investments include the upkeep of software required for operation, adding smart devices that enable remote visibility into the grid and expanding our existing communication infrastructure.

If we want to ensure a reliable, resilient power supply for tomorrow, we must invest today. While deferring investments would mean lower costs for customers in the short term, it would prevent us from seizing the opportunities offered by smart grid technologies, distributed energy resources, microgrids and other innovations that require modern infrastructure.

I never thought in my lifetime that I would witness something so powerful, heartwarming and inspiring. It's called Women UNlimited - UNICEF Canada's women-circled giving collective. The model is simple
