Commercial solar ankara

Ankara Solar Energy, a Turkish module manufacturer, has launched PV Floor, a line of solar panel products that double as anti-slip glass flooring. It is targeted at residential projects and commercial applications, such as shopping centers, driveways, parking areas, terraces, decks, and pedestrian zones.

"The return on investment (ROI) for a 1 kW system in Spain or Greece is typically 4 to 5 years," an Ankara Solar spokesperson told pv magazine. "To complete the PV floor system, adjustable pedestals are required, and we provide these along with the products. There is no need for a steel or aluminum structure."

As Schneider Solar System, our primary goal is quality-reliable service and customer satisfaction on this path we started with the idea of clean environment and natural energy.

We have smart package systems for Giant Factories, Houses, Villas, Containers, Caravans, Irrigation systems and energy systems. The package you need is determined with you based on your system consumption. We also sell all the solar products you need for your existing systems.
