

## Cote d ivoire microgrid control

The government of C?te d'Ivoire aims to facilitate the development of 60 MW of solar at two sites via a new tender. The projects will be built under the World Bank's Scaling Solar program.

Independent power producers will develop the facilities under the World Bank's Scaling Solar program. Interested developers will have until Sept. 6 to prequalify for the procurement exercise.

Several other utility-scale PV projects are now under development in C?te d'Ivoire, including 66 MW and 25 MW plants in Korhogo, in the northern Poro region. Developers are also working on a 37.5 MW solar project in Boundiali department, in the northwestern part of the country.

Your personal data will only be disclosed or otherwise transmitted to third parties for the purposes of spam filtering or if this is necessary for technical maintenance of the website. Any other transfer to third parties will not take place unless this is justified on the basis of applicable data protection regulations or if pv magazine is legally obliged to do so.

You may revoke this consent at any time with effect for the future, in which case your personal data will be deleted immediately. Otherwise, your data will be deleted if pv magazine has processed your request or the purpose of data storage is fulfilled.

Decarbonisation, digitalisation and decentralisation are key players in the energy transition. And the integration and control of thermal, renewable and battery systems is going to be critical to power stability. Our off-grid and microgrid energy solutions put wind and solar power at the forefront, with optimised generator use and lower energy costs. Off-grid wind power, solar power battery storage and microgrid energy storage give you the powerful option of renewable integration.

Another three solar plants - located in Korhogo, M'bengu? and Katiola, with capacities of 116 MWp, 50 MWp and 50 MWp, respectively - have been given scheduled dates of 2026.
