

DMH Electrical UK LTD

DMH Electrical UK LTD

DMH Electrical provides a trusted, reliable and professional relationship for all your electrical needs. DMH is the perfect electrical contractor if you're responsible for maintaining a property portfolio of a commercial premises.

Whether you are a homeowner, business owner or a landlord, you should ensure that your property's electrics are always covered by an up to date Electrical Installation Condition Report. DMH Electrical's experienced team of specialist electricians are registered to carry out these inspections, and provide the certification you need to prove the safety of your electrical systems.

Whether you are working with a new build or a period property, a total fixer-upper or a minor renovation, DMH Electrical can provide you with the support you need to ensure your home's electrics are in safe hands. Every element of your electrical needs can be covered, from installing new switches and sockets through to more complex security or cabling for bespoke architectural designs.

Many older properties will still use older model fuse boards that predate the introduction of the higher safety Residual Current Devices (RCDs) that are now installed as standard and recommended on modern electrical installations. DMH Electrical can carry out simple and cost-effective assessments and upgrades to your fuse boards to ensure your electrics are safe and up to date.

DMH Electrical is at the forefront of the Mechanical Ventillation & Heat Recovery revolution. Our team of experts install and maintain MHVR solutions in homes and businesses, helping to lower their carbon footprints and reduce energy costs. Recovering heat loss and filtering the air, these low maintenance systems can be fitted to new builds or retrofitted into existing properties.

Wiring systems that have not been upgraded or replaced within the last few decades are unlikely to be suitable to support the demands that the heavier technological needs of modern living place upon them. DMH Electrical can provide a full assessment of your wiring and carry out any repairs or rewiring swiftly and professionally with minimum disruption to your home or business.

Overloaded circuits. Electrical surges. Faulty wiring. From time to time, problems occur in your property that require the attention of a professionally qualified electrician. The DMH Electrical team are on hand to assess and repair the fault to the highest standard, no matter the scale of the job; from minor plug socket and light fitting replacements through to full-scale electrical rewiring.

How a property is lit, both indoors and out, makes a huge difference to its ambience and styling, but it also impacts heavily on its energy efficiency and therefore on electricity costs. DMH Electrical offers a wide range of tasteful lighting solutions, including LED lights which are significantly more environmentally friendly,

DMH Electrical UK LTD

provide a longer life span and deliver home owners greater energy efficiency.

From office and shop fits to large commercial premises and retail park developments, the DMH Electrical team can advise on and install the most innovative and efficient solutions to suit your requirements. DMH Electrical also supports Housing Associations and Landlords in maintaining the safety and energy efficiency of their properties, ensuring all reports and inspections are always up to date.

DMH Electrical came highly recommended by numerous friends and when it was time for us to move home, the DMH team were on hand to help with numerous jobs. From installing our security system to adapting and installing our lights in multiple rooms. Nothing was too much trouble, the guys were professional, clean and tidy, plus robust safety procedures were evident to protect everyone from COVID.

DMH Electrical's team of qualified, accredited electrical specialists provide specification, install and repair services to domestic and commercial properties and new developments in Bedfordshire, Hertfordshire, Buckinghamshire and beyond.
