Deka solar batteries

Introducing the Deka Solar Battery 8G8D-HLT-DEKA - the perfect solution for those looking for a reliable and long-lasting backup power source for Photovoltaic (PV) and renewable energy applications. With its reinforced case that resists bulging and meets safety requirements, this battery is designed to provide maximum performance in even the harshest environments.

One of the standout features of this battery is its Genuine Gel Technology. This technology ensures that the battery remains in optimal condition, providing consistent power output over a longer period of time. Additionally, the case and cover are heat-sealed and 100% tested to prevent leaks, ensuring that you can rely on the battery to perform when you need it most.

Advanced Made in America technology with the most modern computer-aided design and manufacturing techniques combine to make Deka's Sealed Gel Batteries the standard by which all other batteries are measured.

Capacity vs. Operating Temperatures: Above are the changes in capacity for wider ambient temperature range, giving the available capacity, as a percentage of the rated capacity, at different ambient temperatures. The curves show the behavior of the battery after a number of cycles.

Solar Electric Supply not only supplies the latest Deka Solar batteries at a discount price, we also design and supply enclosures and off-grid solar power systems engineered specifically for industrial and commercial applications. We support our customers with a friendly knowledgeable staff that is here to answer your questions about any battery, battery enclosure or energy storage system.
