

Earth-leakage circuit breaker

Earth-leakage circuit breaker

This earth leakage circuit breaker from Schneider Electric's Acti 9 iCV40 series features 2 poles, 1 of which is protected (1p+n). This earth leakage circuit breaker with overcurrent protection (RCBO) for low-voltage networks features an outstanding level of protection. Potential danger of ground faults and overcurrent faults is eliminated by this ground fault circuit breaker. Furthermore, this earth leakage circuit breaker features the VisiTrip visible fault indicator, which allows you to see at a glance when action or maintenance is required.

This earth leakage circuit breaker from Schneider Electric's Acti 9 iC60 RCBO series has 4 poles, all of which are protected. The earth leakage circuit breaker further has a rated voltage of 400V, a rated current of 25A and a short-circuit breaking capacity of 6kA. Also, the earth leakage circuit breaker has a mounting depth of 73mm, a rated fault current of 30mA and tripping characteristic C. Schneider Electric Acti 9 iC60 RCBO earth leakage circuit breakers are available in several variants.

This earth leakage circuit breaker from Schneider Electric's Acti 9 iC60 RCBO series has 4 poles, all of which are protected. The earth leakage circuit breaker further has a rated voltage of 400V, a rated current of 16A and a short-circuit breaking capacity of 6kA. Also, the earth leakage circuit breaker has a mounting depth of 73mm, a rated fault current of 30mA and tripping characteristic B. Schneider Electric Acti 9 iC60 RCBO earth leakage circuit breakers are available in several variants.

This earth leakage circuit breaker from Schneider Electric's Acti 9 iC60 RCBO series has 2 poles, all of which are protected. The earth leakage circuit breaker further has a rated voltage of 230V, a rated current of 16A and a short-circuit breaking capacity of 10kA. Also, the earth leakage circuit breaker has a mounting depth of 73mm, a rated fault current of 30mA and tripping characteristic B. Schneider Electric Acti 9 iC60 RCBO earth leakage circuit breakers are available in several variants.

This Resi9 series earth leakage circuit breaker from Schneider Electric features 2 poles, 1 of which is protected (1p+n). In addition, the RCCB has a rated voltage of 230V, a rated current of 16A and a tripping characteristic C. The rated fault current is 30mA and the short-circuit breaking capacity is 6kA. This earth leakage circuit breaker with overcurrent protection (RCBO) features an outstanding level of protection. Potential danger of ground faults and overcurrent faults is eliminated by this ground fault circuit breaker.

The Schneider Electric iDPN N Vigî ground fault circuit interrupter can be installed quickly and easily. The green strip on the rocker switch ensures that all poles can be opened under safe conditions (a padlock lock is possible) so that work can be done on live parts. In addition, the red indicator allows immediate identification of a ground fault. Using the test button, the proper functioning of the device can be verified.
