## Electric vehicle charging costa rica

Electric vehicle charging costa rica

The Costa Rican company ELCO -Energ?asLimpias de Costa Rica-, officially launched its charging network for electric vehicle users a first phase, this network will have 50 7.6 kW medium charging stations, and will later be complemented with 25 14 kW direct current (DC) fast chargers.

This charging network will be installed throughout the country based on a robust analysis carried out by the company that takes into consideration variables such as the battery capacity of the electric vehicles on the market, the gross weight and the typography of the country.

According to Daniel Castillo, president and founder of Elco, "The creation of a charging network like this aims to eliminate the range anxiety that electric vehicle users may experience. As these vehicles gain popularity and their sales increase in the country, we want to ensure that drivers feel more confident and safe as they travel throughout Costa Rica."

To support businesses across the country, Elco will announce in the coming days a call through its social networks. In this call, owners of restaurants, hotels, stores and supermarkets will have the opportunity to apply to receive a charging station for free and be part of the charging network.

Costa Rica is a country that is taking strides toward reducing its carbon footprint. The government has implemented several policies to promote using electric vehicles (EVs) and reduce their dependence on fossil fuels. In May 2022, the country extended benefits to EVs until 2035, including used cars. This article will discuss the benefits of owning an electric vehicle in Costa Rica, the eligibility criteria for these benefits, and their environmental impact.

Eligibility Criteria for Availing Benefits To avail of the benefits of owning an electric vehicle in Costa Rica, the vehicle must meet specific criteria. Firstly, the National Registry of Costa Rica must classify the vehicle as electric. Secondly, the vehicle must meet the country's safety and environmental standards. Lastly, the vehicle must not have been registered in Costa Rica before.

Impact on the Environment The extended benefits of electric vehicles until 2035, including used cars, will significantly impact the environment. According to the Ministry of Environment and Energy, the comprehensive benefits will reduce the country's carbon emissions by 750,000 tons. This is equivalent to removing 200,000 cars from the roads for one year. Additionally, the extended benefits will help reduce the country's dependence on fossil fuels and promote the use of clean energy.

Costa Rica's extended benefits to electric vehicles until 2035, including used cars, is a significant step towards promoting a sustainable future. The benefits of owning an electric vehicle in the country, including exemption from import and circulation taxes, make it a more affordable option for consumers. The eligibility

criteria for the benefits ensure that the vehicles meet the country's safety and environmental standards. The extended benefits will significantly impact the environment, reducing the country's carbon emissions and promoting the use of clean energy.

The benefits of owning an electric vehicle in Costa Rica include a 100% exemption on import taxes and sales taxes for new and used electric cars, as well as a significantly lower cost of ownership due to lower maintenance and fuel costs.

The time it takes to charge an electric vehicle in Costa Rica depends on the battery's size and the charging station's charging rate. Typically, it can take anywhere from 30 minutes to a few hours to fully charge an electric vehicle.

In addition to extending benefits for electric vehicles, the Costa Rican government is also investing in infrastructure for electric vehicles, such as installing more charging stations across the country and promoting awareness about the benefits of electric cars through various campaigns and initiatives.
