

Electric vehicle policy bucharest

"Electric cars used for alternative transport activities with a car and driver mediated through digital platforms, those used on the basis of a contract of use in the system of sharing cars mediated through digital platforms, as well as those which, through stickers, audio-video devices, displays advertising messages that promote commercial activities of any kind, they have the obligation to pay the parking fee", according to Stelian Bujduveanu, the general deputy mayor of the Municipality of Bucharest.

In order to benefit from the free charge, owners of electric and hybrid cars must register the car in the computer register of electric and hybrid cars kept by the operator of the public parking management service.

The identification of the free eco cars will be carried out by the public service operator, at the time of checking the parked cars and based on the records made in the electronic system.
