

Electricity consumption brasilia

Brazil: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Brazil Electricity Consumption: Total data is updated monthly, averaging 24,924.000 GWh from Jan 1979 (Median) to May 2024, with 545 observations. The data reached an all-time high of 47,827.000 GWh in Mar 2024 and a record low of 7,859.000 GWh in Feb 1979.

Brazil could be self-sufficient with domestically produced energy. The total production of all electric energy producing facilities is 674 bn kWh, which is 116 percent of the country's own usage. Despite this, Brazil trades energy with foreign countries.

Final consumption of electricity in the country in 2019 increased by 1.3%. The sectors that contributed most to this increase in absolute values were Residential, which expanded its consumption by 4.8 TWh (+ 3.5%), followed by Commercial which grew 4.1 TWh (+ 4.5%), Energy, 1.3 TWh (+ 4.1%) and Public 0.9 TWh (+ 2.1%).
