

Energy solar panels

Energy solar panels

Whether you have experience shopping for solar panels or you're totally new to researching renewable energy, we strive to provide comprehensive information to help you make a final decision. Check out a few more of our customers' most frequently asked questions.

The average home needs between 20 and 25 solar panels to fully offset their utility bills with renewable energy. This number depends on a variety of factors including location, climate, panel efficiency, and individual panel specifications. For more information, read our article that helps calculate how many solar panels you will need using relevant examples.

Yes, solar panels are worth the investment if you're looking for a long-term renewable energy solution. In general, while solar panels are worth the money, your return on investment (known as a solar payback period) will depend on a few key factors like system size, your electricity use, and your financing or payment method.

Overall, finding the best solar panel brand comes down to comparing their efficiency, temperature coefficient, and warranty. Currently, SunPower, LG, REC, and Panasonic make the best solar panels due to their high efficiencies, competitive pricing, and 25-year warranty. If you're looking for more detail, read our article that compares the top brands and solar panel products.

Before you go solar, consider starting with a no-cost home energy assessment. You'll work with a NYSERDA participating contractor to find all of the places your home is wasting energy, then get financial incentives to help pay for fixing it.

NYSERDA offers objective information and analysis, innovative programs, technical expertise, and support to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels. A public benefit corporation, NYSERDA has been advancing energy solutions and working to protect the environment since 1975. To learn about NYSERDA, visit nyserda.ny.gov.
