MKS Group of Companies is the winner of an International contest «Distributed power generation – Great achievements» in the «Best Project in the field of Distributed Power Generation with Power Up to 5 MW» nomination (2013, 2014)

MKC Group of Companies is a leading Russian manufacturer of gas genset power plants both fixed-site and modular. Since 2005, the company has built 57 turnkey mini PPs in various regions of Russia and abroad. The total volume of power projects implemented is about 300 MW. Our main competitive advantage is decades of experience, a strong team, timely implemented and efficient facilities.

MKC Group of Companies is actively engaged in the turnkey construction and commissioning of diesel power plants in rural and remote areas. In 2022, MKC Group of Companies became an authorized dealer of AKSA to represent the interests of AKSA Power Generation, one of the world leaders in diesel power plants production, in the Russian Federation.

MKC Group of Companies designs and manufactures modules (containers) for gas gensets (4.5 MW, 2 MW, 1.2 MW, 0.6 MW) and packages them. All MKC modules are made of high-quality materials to ensure reliable operation of units in harsh environment and outdoors.

MKC Group of Companies is one of the leading Russian manufacturers of switchboard equipment. The flagships of MKC product range are the single-end service assembled chambers (SESAC), control cabinets (CC), switchboard panels of the Light Panel-70 series. In 2023, MKC commenced serial production of import-substituting switchboard equipment based on domestic components to replace imported analogues that have left the Russian market. MKC products surpass foreign counterparts in a number of parameters.

MKC Group of Companies is a manufacturer of innovation low-noise silencers for gas gensets to ensure super-efficient reduction of noise from power plants. The equipment meets high industry standards and is notable for its engineering novelty, lifetime and low weight.

MKC Group of Companies is a manufacturer of unique Cyclone gas purification plants. The innovation equipment ensures effective and efficient removal of pollutants from the incoming gas thus increasing the service life of gas power plants.

MKC Group of Companies provides services on supplying original spare parts and components to ensure reliable operation of the supplied power equipment. We have consumables, spare parts and tools to repair gas gensets available. In cooperation with the UAE Trade House, we have established logistics supply chains for spare parts and materials from manufacturing plants. This minimizes the risks of equipment failures.

Energy storage companies moscow

We offer the entire complex of works on power plants commissioning on a 'turnkey' basis: from design documentation development and in-house equipment production to commissioning and further maintenance of facilities.

The MKS Group of Companies implements projects for customers from different regions of Russia and abroad - leaders in their areas of business. We build long-term partnerships and form a big team with our customers. Together we are able to implement projects of any level of complexity.
