Energy storage for electric vehicles samoa

Under the scheme of the Project, the sub-project Climate Action Pathways for Island Transport (CAP-IT): Accelerating the Decarbonization of Samoa's Land and Maritime Transport Sectors, started in April 2023.

The overall objective of the CAP-IT project is to promote urgent and inclusive transformation of the land and maritime transport sectors towards decarbonisation, by accelerating the uptake of EVs and outboard motors. All in which is to support the achievement of Samoa's enhanced Nationally Determined Contribution (NDC) for the energy and transport sector by 2030.

Introducing the basics of EV battery technology and EOL disposal, the report will serve as a indicative document to support the Government of Samoa to develop contextualised, effective, and efficient strategies and solutions for EOL EV battery disposal in the country.
