Energy storage solutions montevideo

EnerVenue, the first company to bring metal-hydrogen batteries capable of 30,000 cycles to the clean energy revolution, today announced a Master Supply Agreement with VedantaESS. Per the terms of the deal, VedantaESS will procure and deploy 525 MWh of EnerVenue's Energy Storage Vessels(TM) (ESVs) over the next three years.

The partnership with VedantaESS is EnerVenue's first deal in South America. The company continues to execute an accelerated global sales strategy that has delivered EnerVenue's energy storage solutions into applications across the world.

"VedantaESS understands that long-duration energy storage must go beyond lithium-ion and has smartly grown its organization around sourcing and supplying advantageous alternatives for customers," said Randall Selesky, Chief Revenue Officer, EnerVenue. "EnerVenue fits perfectly into VedantaESS's strategy to bring flexible, and sustainable solutions to the Brazilian and South American markets. We look forward to working closely with them and bringing our ESVs into more applications."

Montevideo Post is a global leader in the online news. We seek to inform and engage with our readers. Staffed 24 hours, seven days a week by a dedicated team around the globe, we deliver news from journalist around the world. We are contrarian truth-seekers and truth-tellers. We are journalist united by a mission to inform and engage with our readers.
