

Europe renewable energy chad

The construction of these two power plants meets the government's sustainable development goals (SDGs) aimed at significantly increasing the share of renewable energies in the Chadian energy mix and reducing greenhouse gas emissions by 18.2% by 2030, compared to a 2010 baseline.

“We are part of a desire for partnership and support for the government's energy policy and will do everything possible to actively involve local communities in the development of our projects,” said Marc Galinier, director of sub-Saharan Africa activities at Qair group. “The environmental impact is an essential factor for us and we seek first to integrate and work with the inhabitants of Gassi and Lamadji.”
