

Forklift batteries for sale

Forklift batteries for sale

When you need to replace your old 2V traction battery, you need to be sure you get the right battery for the job. That's why we need to ask you some questions before we can help you buy the right battery for your needs.

All batteries come with some form of I.D plate or sticker, this plate will be located somewhere on the steel box in which the cells are fitted. The following information can be found on this plate.

This battery may come with the suffix "S" or "G" (ie NP1.2-6S, NP1.2-6G) dependent on available stock, this suffix is to signify to Yuasa personnel that the product has been made on a new production line which has been introduced due to the increased demand for the battery. There is no change in quality or performance of the battery.

The VARTA battery package packs a powerful punch. Our adherence to the highest quality standards mean there is no room for compromise, and our technological expertise leads to continual innovation and improvement. This is why we can, again and again, offer the market products which guarantee improved power and reliability - products which further extend our lead over the competition

Yuasa has renamed the Yuasa Yucel range of batteries to Yuasa Yuvolt, the specification of the battery has not been changed, this is simply a labelling rebrand of the former retired brand "Yuasa Yucel"
