

Free standing electric car charger

Free standing electric car charger

This is our entry level, single phase 7kW charger mounted on a plinth. The Freestanding Home 7 offers incredible build quality and a range of smart features delivered in an elegant and understated design. Providing smart tariff integration and dual tariff support for cost efficient charging. Home 7 Plus Find your style

The Freestanding Home 7 Plus offers everything you get with the Home 7 and a bit more. Solar charge and automatically load balance energy between the charger and your home*. Courtesy downlighting and customised colours and finishes from a classic British design palette. Our most popular charger. Home 22 Plus Power meets design

The most powerful charger in the range. Freestanding Home 22 Plus offers the same features as the 7 plus and can deliver a 22kW charge when connected to a three-phase power supply. You can also use the charger with a single-phase power supply. All that power is housed in a unit with the same sleek design as the other chargers in the Simpson & Partner's Home Freestanding range.
