

Georgia electric vehicle adoption

Georgia electric vehicle adoption

Under the Build Back Better plan, President Joe Biden has set a goal for half of all new vehicles sold in the U.S. in 2030 to be zero-emissions vehicles. This all comes as Georgia Gov. Brian Kemp wants the Peach State to be a frontrunner by becoming the electric mobility capital of the U.S.

On Monday's edition of "Closer Look," show host Rose Scott spoke with guests about the current state of EV production and adoption in the U.S. and what's being done to increase the EV workforce.

WABE's mission is simple: "Inform, inspire, reflect and empower our greater Atlanta community. " We do that through the news, information, and entertainment we bring you via radio and TV, on your phone, in your car, on your smart speaker, or online at the new WABE --anywhere and everywhere throughout greater Atlanta. And we can only do this with your help. Please consider becoming a member of WABE today.
