

Ghana free solar panels

Ghana free solar panels

Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

Collectively, these programs will deliver on the Greenhouse Gas Reduction Fund's objectives by reducing greenhouse gas emissions and other air pollution, delivering cost savings on electric bills for overburdened households, and unlocking new markets for distributed solar in states and territories that have never had statewide low-income solar program before.

The 60 applications selected to receive awards include 49 state-level awards, six awards to Tribes, and five innovative multistate awards, spanning the entire country. View the 60 grant recipients in this table:
