

Ghs5000 solar generator

Ghs5000 solar generator

Introducing the highest capacity Goal Zero power station to date. Equipped with 6000 watt-hours of lithium power, the Yeti 6000X will run power-hungry devices and appliances for days on end. Enjoy a wide range of powering options with seven versatile ports, including an industry-leading 2000W AC port to run nearly anything you could from a wall outlet. Power RV's, trailers, off-grid events, work sites, essential circuits in your home, and more.

A: Please note that the AC output port can only charge/power devices that operate at less than 500-Watt. Once exceeding, the Explorer 500 will shut off automatically. Please refer to your device specification before purchase.

A: Working time = $500\text{Wh} \times 0.85 / \text{operating power of your device}$. For reference, assuming power consumption of your device is 60W (might be a box fan), working time will be $500\text{Wh} \times 0.85 / 60\text{w} = 7\text{hrs}$ (rough calculated). Please note: actual power consumption varies from different usages, please consult Jackery for better purchase decision.

A: Within 7.5 hours from an AC wall outlet; Also another two recharge backup choices for your convenience, recharge from car port around 7.5 hours, and around within 9.5 hours from Jackery Saga 100W solar panel (Sold Separately).

The Jackery 500 might be my favourite Jackery product yet. It's lightweight and easily portable, the battery life is great. It's powerful enough to handle useful, common appliances and easy to charge in the car as well as at home. Recommended

We bought this to use in our newly installed Arctic bbq cabin, we didn't have power in that part of the garden and would've been a big job to put in so opted for the power bank, it charges in few hours and holds it well, we have led lights plugged into it but it's also handy in the event of power cut as this charges other biggish items in the home. We live rural so defo worth buying. Seems very good quality, we are happy with purchase.

Finally committed to purchasing a Jackery 500 and really impressed with performance and features. Mainly used as secondary power in a campervan and already it's proved an asset. Would definitely recommend and more so since the price reduction
