

Grid modernization naypyidaw

Mr. Kitti Petchsantad, Deputy Governor - Transmission System of the Electricity Generating Authority of Thailand (EGAT), and Mr. Athip Tantivorawong, Chief Executive Officer of INNOPOWER Company Limited, signed the Memorandum of Understanding (MOU) on grid modernization in the fields of Unmanned Aerial Vehicles (UAV), Unmanned Aircraft Systems (UAS) platform and center, and online management system for transformers on August 25, 2023 at EGAT 50th Anniversary Building, EGAT Headquarters.

Mr. Kitti Petchsantad, EGAT Deputy Governor - Transmission System, revealed that the future transmission system will incorporate modern technologies to enhance grid performance. With the collaboration with INNOPOWER Company Limited on the development of transmission system technologies, it is a great opportunity for business expansion. Moreover, it is a significant opportunity for Thailand to step toward becoming a leader in grid modernization in the region.

Mr. Athip Tantivorawong, Chief Executive Officer of INNOPOWER Company Limited, added that being committed to investing in future energy innovations and technologies, developing new businesses, and collaborating with business partners; INNOPOWER is pleased to support the development of grid modernization, one of the energy strategies of EGAT Group and Thailand. This collaboration is a good beginning to pave the way for EGAT and the country's bright future.
