

Grid modernization united states

Grid modernization united states

The GRIP program will have a long-lasting, substantial impact on our nation's economy, energy reliability, and community-level resilience. Join us over the coming weeks for a blog series as we dive into these lasting benefits both at the local, regional, and national level. GDO also invites you to join us for a webinar on October 24, 2023 at 2:30 PM to showcase GRIP awardees and discuss trends in the application process. [Registration here.](#)

"DOE is making financing available for projects that improve resilience and expand transmission capacity across the electrical grid, so we can reliably move clean energy from places where it's produced to places where it's needed most," said Energy Secretary Granholm. "This is a down payment on our efforts to modernize our transmission nationwide--but we need the American Jobs Plan to complete them. These investments will make our power system more resilient against threats and more reliable as we increase our clean energy capacity, creating thousands of jobs in the process."

"This announcement reflects the Biden-Harris Administration's commitment to use resources across the government to combat climate change," said Transportation Secretary Pete Buttigieg. "Our new guidance will help states use their rights-of-way to expand clean energy, lower costs, and create good-paying jobs in their communities. Today's actions can provide a model for our private partners, like railroads, to do the same."

Today, independent analysts, the Americans for a Clean Energy Grid, issued a report entitled: "Transmission Projects Ready to Go: Plugging into America's Untapped Renewable Resources." The report estimates that with financing and siting tools such as those advanced by the American Jobs Plan, more than 20 transmission projects are positioned to move from an advanced planning stage into construction, creating hundreds of thousands of jobs and potentially unlocking around 60,000 megawatts of new clean energy capacity in the U.S.

We'll be in touch with the latest information on how President Biden and his administration are working for the American people, as well as ways you can get involved and help our country build back better.
