

Hoppecke batteries price

The fines are: Battery Supplies, €517,000 (\$584,494); Celectric, €71,000 (\$80.249); Emrol, €241,000 (\$272,394); Enersys, €1,798.000 (\$2million); Exide Technologies, no fine; Hoppecke €1,230.000 (\$1.39million).

BCA stated on their website that this sudden price increase had caused the undertakings concerned (except Emrol) to instate multilateral meetings to discuss the situation with each other.

The statement continues: “The discussions culminated in agreements relating to a common lead surcharge which was applied to the selling prices of motive batteries of their clients in Belgium.

“The practice at issue was denounced late 2013 by Exide Technologies that benefits of a full immunity in this case. Subsequently Hoppecke, Battery Supplies and Enersys also applied for leniency and were granted a reduction of the otherwise applicable fines.”

Following the leniency application of Exide Technologies, the Investigation and Prosecution Service opened an investigation and carried out inspections in April 2014 at Battery Supplies, Emrol, Enersys and Hoppecke Belgium.

Frederick Adjei and Andreas Manhart of Germany's Ölko-Institut and Franziska Weber from Platform Lead explain a project on environmentally sound lead-acid battery recycling in Nigeria, a...
