Hospital energy storage stockholm

Hospital energy storage stockholm

Medical advancements have made treatments more advanced, personalized and often more costly. Staying in a hospital can have negative consequences for a person"s health, e.g. being away from familiar surroundings and faces and the risk of health care-associated infections. Many countries invest heavily in hospitals and healthcare infrastructure. There is thus a pressure for more efficiency in hospital building and operations - from financial, human resource and environmental viewpoints.

 SDG 3 aspires to ensure health and well-being for all, including a bold commitment to end the epidemics of AIDS, tuberculosis, malaria and other communicable diseases by 2030.

Unnecessary hospitalizations can be avoided through out-patient care and remote follow-up and monitoring. Digitalization supports innovative and smart ways of planning and working, also improving patient flows. Most hospitals have innovation departments and collaboration with academia and industry.

Swedish solutions help hospitals to be more resilient and sustainable. Sweden is home to world-class healthcare architects and planners. Their work, combined with green infrastructure solutions and innovative digital technologies, lays the foundation for sustainable, smart, and safe care. For many years Sweden has been a leading country of innovative medical technology solutions contributing to efficient, qualitative, and patient-safe advanced healthcare.

True. The research found that the combined emissions from hospitals, health services and the medical supply chain across the OECD group of market-based economies, as well as China and India, make up around 4,4% of the global total. This is a larger share than either aviation or shipping.

View this film presentation of Karolinska University Hospital - one of the largest university hospitals in Europe. Patients come to Karolinska from all over Sweden and from other countries. We receive 1.35 million patient visits each year.

ADDI Medical has developed a new point of connection for patients and healthcare. Our digital solution enables collection of health information from the individual - effectively, safely and in compliance with legal requirements. Our technology offers a unique tool for healthcare players, such as health providers and the life science industry, to receive and analyze patient generated information, and thereby, provide patient centered care.

Alteco Medical AB is an ISO 13485 certified medical device company founded in 2002. We offer a unique technology for blood purification during hemoperfusion treatment. Our solution for extracorporeal endotoxin elimination helps hospitals manage endotoxemia and sepsis in the ICU, and to avoid these conditions post-operatively. Our mission is to safely stabilize patients by early removal of endotoxin from the

bloodstream, turning the course of sepsis before septic shock occurs.

At Arjo, we believe that empowering movement within healthcare environments is essential to quality care. Our solutions and products are designed to promote a safe and dignified experience through patient handling, medical beds, personal hygiene, disinfection, diagnostics, and the prevention of pressure injuries and venous thromboembolism. With over 6000 people worldwide and 60 years caring for patients and healthcare professionals, we are committed to driving healthier outcomes for people facing mobility challenges.

AroCell develops standardized modern blood tests to support the prognosis and follow up of cancer patients. AroCell's new technology is based on patented methods to measure Thymidine Kinase 1 (TK1) protein concentrations in a blood sample. The TK 210 ELISA test provides valuable information mainly about the condition of cancer patients. This may help clinicians to optimize treatment strategies and estimate the risk of recurrence of tumour disease during the monitoring of the disease.

Axel Health is a software healthcare company focusing on Patient Flow Management Systems for private and public healthcare providers. Axel Health aims to support healthcare by offering caregivers and healthcare staff the possibility to plan and optimize patient workflows and thereby ensure that healthcare staff and patients can meet at the right place at the right time. Carefully planned logistics improves the daily life for patients and healthcare staff.

Axis enables a smarter and safer world by creating network solutions that provide insights for improving security and new ways of doing business. As the industry leader in network video, Axis offers products and services for video surveillance and analytics, access control, intercom and audio systems. Axis has more than 3,800 dedicated employees in over 50 countries and collaborates with partners worldwide to deliver customer solutions.
