

Hubble 100ah 12v lithium battery

Hubble 100ah 12v lithium battery

The Hubble S Series is a standalone li-ion LiFePO₄ battery. These lithium batteries are in the form factor of traditional lead-acid/AGM/gel batteries (slightly SMALLER than a standard 100ah lead acid type battery).

NB – Please ensure you can set your inverter CUT OFF voltage to 11.2V, else the BMS will cut off and the battery will go dead (and will need to be jumped). You can only use this battery in the Mecer 1200VA/2400VA type inverters bought AFTER March 2023. We recommend using this battery ONLY with an inverter that is able to set cut off to 11V or more.

The S-100A has an integrated BMS inside the battery container, which also contains the prismatic lithium cells. The S-100A can be connected up to 4 times in series maximum. You can configure the batteries in 12V, 24V, 36V or 48V in series.
