iPhone 11 battery replacement

No matter which iPhone model you have, issues like a cracked screen or dead battery can prevent you from listening to music, navigating apps, and using email. If the need arises, Tech Renu can help make your iPhone function like new again in notime.

Your iPhone battery is designed to last hours in-between charges, but a battery that won't hold a charge can put a significant damper on your productivity. Here are five indications that you may need an iPhone battery replacement:

The ease of communicating and navigating with the touch of a button can be a challenge when your home button isn't working properly. However, it's not uncommon for buttons to develop issues after frequent use. If your home button becomes stuck, consider getting your iPhone home button repaired.

When you take your iPhone with you everywhere you go, there's always a chance of dropping it on the ground at some point. Not only is a cracked screen unsightly to look at, there may be other implications to worry about. Before you decide to hold off on scheduling iPhone screen repair, consider the following risks:
