The latest version of the energy management system (EnMS) standard, ISO 50001:2018, was published on August 21, 2018. This revision marks the second edition of the standard. [Learn more](#)

Based on the recently published ISO 50001:2018 standard, we have developed a readiness checklist to guide you through the changes in the standard and determine its key areas of development.

The ISO 50001:2018 Readiness Checklist will provide valuable insights and enable you to determine next steps for your organization and to ensure a smooth transition to the latest version of the standard.

This webinar provides an overview of ISO 50001:2018, the latest version of ISO 50001, including the key changes that have been made to the standard and the steps required to prepare for the transition to the new version.
