Kathmandu energy storage systems

GridVille is an interdisciplinary joint NTNU-KU program that aims to design and develop sustainable electricity systems while also providing development assistance to Nepal's energy deficient rural communities. Constant growth in energy demand and the phase-out of non-renewable energy are posing problems for developing countries such as Nepal.

The water tank in the site will be used to store water pumped from river which will be used to irrigate agricultural land and provide drinking water facility in the Village. The tank has the storage capacity upto 50000 liters.

GridVille Programme Kathmandu University and EnergizeNepal, in collaboration with Kathmandu University School of Law, ICIMOD, and CETRF, successfully organized the National Renewable Energy and Policy Symposium (NREPS) 2023 at Hotel Himalaya, Pulchowk Lalitpur on July 30, 2023.
