

Kiewit offshore services ingleside yard

Kiewit offshore services ingleside yard

Kiewit performed the front-end engineering design, engineering, procurement, construction and commissioning of the South Pass 89E Expansion platform at its yard in Ingleside, Texas. This offshore platform serves as a tie-in point for an existing pipeline system, moving crude oil from the Appomattox platform in the Gulf of Mexico to the existing Proteus pipeline system in South Pass Block 89E.

The scope of work included the fabrication of a 6,500-ton topsides; a two-level, 12-person living quarters; a 4,500-ton jacket and 2,000 tons of piles. Additionally, detailed engineering was performed to strengthen the existing platform to receive the bridge structure from the new greenfield platform, including the removal of the helideck and crane swap on the existing platform.

Kiewit constructs large complex offshore platforms at our 500-acre fabrication facility in Ingleside, Texas and at our two facilities in Newfoundland, Canada. Our core services include fabrication of jackets, topsides, onshore and offshore modules, living quarters, subsea kits, piles, and tendons. With more than 25 years of experience, talented people, deep water access and a vast fleet of equipment, we are uniquely qualified to handle any size project.

Kiewit began fabricating topsides and jackets in the mid-1980s for offshore production facilities and has since expanded its expertise to include offshore and onshore projects across a diverse array of markets. Today, our fabrication facilities consistently deliver world-class projects for locations around the globe. Our integrated engineering, procurement, construction and commissioning (EPCC) approach starts with construction-focused engineering and includes self-performing all critical path scopes of work, ultimately driving cost and schedule certainty.

In the building market, Kiewit specializes in constructing office buildings; industrial complexes; education and sports facilities; hotels; hospitals; transportation terminals; science and technology facilities; manufacturing, retail and special-use facilities and extensive interior construction with tenant improvements.

Drawing on 140 years of experience and resources, Kiewit is supporting the development and execution of critical and first-of-a-kind Industrial projects by providing adaptable, custom solutions that fit the evolving needs of our clients and markets.

Kiewit specializes in mine management, production, infrastructure construction, maintenance and contract mining ventures, offering some of the most highly-skilled and experienced professionals in the industry.

For more than half a century, Kiewit has served domestic and international oil, gas and chemical (OGC) companies and project developers by offering full project delivery services for facilities of all sizes and complexities in the following sectors: offshore, oil sands, gas processing, pipeline facilities, tanks and
