## Kingston energy conservation

Kingston, dating to the arrival of the Dutch in 1652, is a vibrant city with rich history and architecture, was the state's first capital, and a thriving arts community. City Hall is in the heart of the community at 420 Broadway, and is open from 8:30 a.m. to 4:30 p.m., except July & August (9 a.m. to 4 p.m.). Come tour our historic City, with restaurants that are among the region's finest, and local shopping that promises unique finds.

Kingston became New York's first capital in 1777, and was burned by the British on October 13, 1777, after the Battles of Saratoga. In the 19th century, the city became an important transport hub after the discovery of natural cement in the region, and had both railroad and canal connections.

The town of Rondout, New York, now a part of the city of Kingston, became an important freight hub for the transportation of coal from Honesdale, Pennsylvania to New York City through the Delaware and Hudson Canal. This hub was later used to transport other goods, including bluestone. Kingston shaped and shipped most of the bluestone made to create the sidewalks of New York City.

The City of Kingston is a leader in efforts to create a more energy-efficient and sustainable community. Kingston has taken a comprehensive approach to building a city that is equipped to meet modern challenges and embrace 21st century opportunities.

This webpage was developed with technical assistance from Elizabeth LoGiudice through a partnership between the City of Kingston, River Haggie Outdoors and Cornell University Water Resources Institute, with funding from the Environmental Protection Fund through the New York State Department of Environmental Conservation Hudson River Estuary Program.
