This is the first national infrastructure investment plan for Kiribati. The plan provides an investment screening and prioritization framework to ensure that future investments align with the national development priorities of Kiribati for the next 10 years. This publication is a summarized version of the Kiribati National Infrastructure Investment Plan.

Promoting Outer Islands Development Through the Integrated Energy Roadmap (POIDIER) project is a climate mitigation project funded by the Global Environment Facility (GEF) trust fund. The project is implemented by UNDP in partnership with the Government of Kiribati.

The main objective is to enhance the outer island development through the achievement of renewable energy (RE) and energy efficiency (EE) targets of Kiribati as stated in the Kiribati Integrated Energy Roadmap (KIER). The project was launched in January 2021 and is anticipated to complete in 2024.

The demo PV mini-grid systems will be installed on the outer islands/rural areas and it will be the first to have a revenue and billing system to facilitate financial sustainability. High-quality solar grid systems at globally competitive costs will be installed and distributed to the outer islands.
