

Lisbon hospital energy storage

The EIB loan will finance the 30-year Design-Build-Finance-Operate-Maintain (DBFOM) concession of Hospital de Lisboa Oriental (HLO). HLO is a new acute, specialist care and teaching 875-bed hospital to be built in Chelas, in the eastern part of the city. The project is part of the Ministry of Health's hospital modernisation and reconfiguration strategy across the Lisbon area and beyond.

The new hospital will largely substitute six existing hospitals located in the city centre and managed by one entity (Centro Hospitalar de Lisboa Central, EPE - CHLC). Since the project involves both the upgrade of health estate and improvement of service delivery, it falls under the EIB's primary objective "Innovation, digital and human capital" (Health). It is also eligible under Article 309 point (c) "common interest" and under Article 309 point (a) "EIB Cohesion Priority Region".

The project includes the construction of a new hospital replacing six outdated facilities to consolidate all services in one new building. The project will improve the efficiency and quality of healthcare services. The project is in line with EU and EIB policy objectives for the healthcare sector.

Before financing approval by the Board of Directors, and before loan signature, projects are under appraisal and negotiation. The information and data provided on this page are therefore indicative. They are provided for transparency purposes only and cannot be considered to represent official EIB policy (see also the Explanatory notes).

The EIB is committed to open communication and encourages constructive stakeholder input regarding its activities. Enquiries and comments concerning the EIB's involvement in a project or the financing facilities, activities, organisation and objectives of the EIB, can be sent to the EIB Infodesk. Alternatively, the EIB can be contacted through its external offices. Queries regarding details of a specific project, in particular when it is under appraisal by the EIB, should preferably be addressed directly to project promoters.

Any complaint regarding alleged maladministration can be lodged via the EIB Complaints Mechanism. The European Ombudsman acts as an independent external accountability mechanism of the EIB.

The EIB has a zero tolerance policy on fraud or corruption. To report allegations of fraud and corruption relating to EIB-financed projects, please contact the Fraud and Investigation division. All complaints will be treated as strictly confidential and handled in line with the EIB investigation procedures and the Anti-Fraud Policy.
