Mark c honeywell biography

Mark Charles Honeywell (December 29, 1874 - September 13, 1964) was an American electronics industrialist. He co-initiated the eponymous corporation Honeywell and was its first president and CEO (1927-1933).

Honeywell spent his childhood growing up in Wabash, Indiana, and Florida. He had various jobs during his younger years, including working in the citrus and bicycle businesses, and in his father"s Wabash mill. He graduated from Eastman Business College in Poughkeepsie, New York, in 1891.

By 1927, annual company sales were more than $1.5 million, and 450 people worked in the Wabash factory.[2] Honeywell"s main competitor was W.R. Sweatt and his Minneapolis Heat Regulator Company. The two companies had patents which blocked each other from further growth. They merged to form the Minneapolis-Honeywell Regulator Company,[3] with Sweatt as chairman and Honeywell as president.

As of 2007[update], Honeywell International, Inc., the corporate descendant of Minneapolis-Honeywell, is a global business with more than 100,000 employees.

In 1939 Mark Honeywell made a commitment to build the Honeywell Memorial Community Center, dedicated to his late wife and to his parents. He established The Honeywell Foundation, Inc. in 1941 to operate the Center. The Center reflects Mr. Honeywell"s belief that many children were "growing up in a different environment" and needed the help of organized programs. Today, the Center offers a wide range of events that bring cultural activities to the residents of Wabash and surrounding areas. The Center also provides facilities to accommodate special community events.

Mark Charles Honeywell (December 29, 1874 - September 1964) was a U.S. electronics industrialist. He founded the eponymous Honeywell, Incorporated and was its first president (1927-1933) and CEO (1927-1933).

younger years, including working in the citrus and bicycle business, and in his father"s Wabash mill. He graduated from Eastman Business College in Poughkeepsie, New York in 1891.

Honeywell developed a hot water heating system, and by 1905 had installed the system in his house - thought to be the first in North America.[citation needed] The idea of hot water heating came from England. Radiators first came from England and molds were made from them in Wabash. His business, M.C. Honeywell Heating and Sanitary Work, became Honeywell Heating Specialties Company. By 1906 the company was making thermostats and automatic controls for heating systems.

By 1927, annual company sales were more than $1.5 million and 450 people worked in the Wabash factory. Honeywell"s main competitor was W.R. Sweatt and his Minneapolis Heat Regulator Company. The two companies had patents which blocked each other from further growth. They merged to form the Minneapolis Honeywell Regulator Company with Sweatt as Chairman and Honeywell as President.

Honeywell (disambiguation) -- Honeywell can refer to:*Honeywell, an American multinational corporation **Mark C. Honeywell, founder of Honeywell **Honeywell 200, a computer by Honeywell **Honeywell 316, a computer by Honeywell **Honeywell 6000 series, a computer by Honeywell… ... Wikipedia
