

Mauritius electric vehicle charging

Mauritius electric vehicle charging

E-motion's home EV charging station offers a convenient and efficient way to charge your electric vehicle from the comfort of your own home. Our charging station is easy to install and can fully charge your vehicle overnight, so you're ready to hit the road in the morning.

E-motion's public EV charging stations offer a reliable and convenient way to charge your electric vehicle when you're on the go. Our chargers match any vehicle type and provide power up to 22 kW. Charging stations are in convenient locations, making it easy to find a station near you.

E-motion's business EV charging station is the perfect solution for any business looking to provide a convenient and reliable charging option for their customers, employees, or fleet. Our charging stations are easy to install and can be customized to fit the needs of your business.

IBL Energy and Vivo Energy have launched E-Motion which will facilitate electrical vehicle (EV) charging through a vast network of fast charging stations throughout Mauritius.

This initiative was welcomed by Alan Ganoo, Minister of Road Transport and Light Rail, who also announced that the National Transport Corporation (CNT) intends in the near future to operate 200 electric buses to reduce greenhouse gas emissions while promoting an ecological mode of transport.

E-Motion provides the country with its very first network of charging stations for electric cars. To date, twenty terminals have been installed in different places on the island to meet the needs of those with electric vehicles in terms of reliability and speed. The locations identified are situated near highways, shopping centres, gas stations, health facilities, hotels etc.

E-Motion will offer a subscription on an annual basis with three packages. When subscribing, the customer will receive a smart card that has different options dependent on the user's requirements. Companies with a fleet of vehicles will have a corporate option to suit their requirements.

Besen deliver the most innovative, safest, and smartest electric vehicle components, including all kinds of EV plugs, sockets, extension cables, connectors, and charging stations to our customers from all over the world.
