Max capacity for solar plant in ghana

Max capacity for solar plant in ghana

Statista R identifies and awards industry leaders, top providers, and exceptional brands through exclusive rankings and top lists in collaboration with renowned media brands worldwide. For more details, visit our website.

As of 2022, existing solar power generation resources in Ghana had a total installed capacity of 112 megawatts, including embedded generation facilities. The power production facilities Bui Solar and BXC Solar registered installed capacity of 50 megawatts and 20 megawatts, respectively. Moreover, the Volta River Authority solar plant in Kaleo had an installed solar power capacity of 13 megawatts, of which none was dependable.

The source defines installed capacity as: "The total of the capacities shown by the name plate ratings of similar kinds of apparatus, such as generators, transformers, or other equipment in a station or system".

All data and visualizations on Our World in Data rely on data sourced from one or several original data providers. Preparing this original data involves several processing steps. Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived indicators such as per capita measures, as well as adding or adapting metadata such as the name or the description given to an indicator.
