Microgrid control democratic republic of the congo

Sweden, through the Embassy in Kinshasa, is supporting the expansion of BGFA to the Democratic Republic of the Congo with SEK 200 million (~ EUR 20 million). The overall aim of the new country programme is to create access to affordable renewable energy solutions for people living in rural and peri-urban areas in the country.

Nefco, as the BGFA Fund Manager, and Sweden has signed a Letter of Intent with L' Agence Nationale de l'Électrification et des Services Énergétiques en milieux rural et périurbain (ANSER), the national authority in charge of planning, overseeing and financing off-grid electrification in the Democratic Republic of the Congo, to support the implementation of Beyond the Grid Fund for Africa programme in the country.
