

Moroni utility-scale energy storage

Moroni utility-scale energy storage

Building on their initial partnership established in February 2024, which included three projects totalling 400MW, the two companies now commit to co-developing an additional 11 sites with a total capacity of 2.5GW.

This expansion brings the total development pipeline managed by the BW ESS and ACL Energy partnership to 14 schemes, representing 2.9GW of capacity across Italy's North and South electricity zones.

According to Terna, the Italian transmission system operator, the country added 2.9GW of wind and solar capacity in 2022, 5.7GW in 2023, and another 5.4GW in the first nine months of 2024.

ACL Energy managing partner Nicola Locascio added: "We are proud to strengthen our partnership with a global leader like BW ESS, whose expertise in energy storage is invaluable.

"This collaboration is a cornerstone of our medium- and long-term strategy, reinforcing ACL Energy's ambition to lead in Italy's rapidly growing energy storage sector."
